Management has direct contact with Legislators, their staff and Government officials to advocate the Hospital's position on key issues affecting the hospital. Frequently, these contacts are made to educate the appropriate representative or official on the implications of specific policy/legislation on the industry in general and/or implications to Fox Chase. At the federal level, during FY 2017 the Hospital advocated for increased medicare reimbursement under the cancer center rules and advocated for increased research funding for the NIH and NCI. Management also provided input on various issues including health care reform and important issues such as drug shortages legislation. Additionally, to assist the Fox Chase entities obtain needed funding for cutting edge technologies and resources used by the scientific and clinical faculty, the hospital affiliate submitted federal grants through the appropriate mechanisms. At the state level, management advocated for the sustained use of Tobacco Funds to support the various cancer programs in the Commonwealth. This funding is central to the programs conducted by the Fox Schedule C (Form 990 or 990-EZ) 2016

Part V, Section B, line 5: The community health needs assessment (CHNA)

was completed in 2016 with input from primary and secondary data including

U.S. Census, Pennsylvania Department of Health Vital Statistics, Claritas

Inc., PHMC's 2015 Southeastern Pennsylvania Household Health Survey, and

tumor registry data from Fox Chase Cancer Center (FCCC). The target area

included in the CHNA is the primary service area for the institution and

comprises 87 zip codes in Bucks, Montgomery and Philadelphia counties with 632098 11-02-16 Schedule H (Form 990) 2016

a total population of 1,881,289.

In addition to the quantitative data utilized for the CHNA, additional community input was derived from community meetings with individuals living and/or working in the communities in the hospital's service area who could provide input on the needs assessment as community members, public health experts, and as leaders or persons with knowledge of underserved racial minorities, low income residents, and/or the chronically ill. In total, 4,441 interviews were conducted with adults from the targeted region.

The final CHNA is available to the public via the organizations website https://www.foxchase.org/community/community-health. Additional dissemination of its findings have been presented to the Board of Directors, senior leadership, and to multiple entities within FCCC including: American College of Surgeons (ACoS) Commission on Cancer, Cancer Committee, Cancer Prevention and Cancer Control (Behavioral Research team) and staff from the Office of Community Outreach, the primary education and outreach arm for the institution.

Group A-Facility 1 -- The American Oncologic Hospital

Part V, Section B, line 7d: The CNHA provided a broad overview of the

needs of our community, however, as an NCI Comprehensive Cancer Center,

our sole focus is cancer. Within the cancer control realm, we address the

entire cancer continuum from prevention to survivorship. An implementation

plan has been developed to address the needs which include lack of

knowledge regarding cancer, access to care, specifically screening and 632098 11-02-16 Schedule H (Form 990) 2016

preventative care, smoking prevention, intervention and cessation, obesity which has been associated with increasing the risk of certain cancers, cultural and language needs to address the evolving changes in the community population, and health system navigation. During the reporting period, the CHNA was completed, an implementation plan has been developed and approved by the Board of Directors and teams have been tasked with implementing specific tasks and/or projects to address the identified needs. Additionally, the plan has been posted to the FCCC website https://www.foxchase.org/community/community-health

Group A-Facility 1 -- The American Oncologic Hospital

Part V, Section B, line 11: Dox Chase Cancer Center (FCCC) Office of

Community Outreach (OCO) has addressed the following unmet needs

identified in the 2016 Community Health Needs Assessment (CHNA):

Demographic Changes - the anticipated growth in older populations does not present a challenge for Fox Chase. According to the 2015 Tumor Registry data, 87% of our patient mix in the service area is between the ages of 50-99.

Language Needs - In preparation for the changing language needs, we have embarked on a quality improvement plan for language services. We have established an institutional policy to address languages services that includes on-site medical interpreters, language lines and remote video units for our deaf community and amplifiers for our hard of hearing patients. Thus far we have instituted the policy and identified and credentialed physicians who speak a second language, other than English. 632098 11-02-16 Schedule H (Form 990) 2016 Section C. Supplemental Information for Part V, Section B. Provide descriptions required for Part V, Section B, lines 2, 3j, 5, 6a, 6b, 7d, 11, 13b, 13h, 15e, 16j, 18e, 19e, 20e, 21c, 21d, 23, and 24. If applicable, provide separate descriptions for each hospital facility in a facility reporting group, designated by facility reporting group letter and hospital facility line number from Part V, Section A ("A, 1," "A, 4," "B, 2," "B, 3," etc.) and name of hospital facility.

Individual languages that address this need include the following languages/dialects: Spanish, Mandarin, Cantonese and Vietnamese. Other languages are available however; this speaks directly to the identified need in the CHNA. Non-clinical staff who speak another language are offered the opportunity to train as dual-medical interpreters through an approved vendor. Translations of materials produced by Fox Chase undergo review by a certified translation service to ensure accuracy as well as compliance with the National Standards for Culturally and Linguistically Appropriate Services in Health Care and the Joint Commission's Roadmap. Additional efforts are focused on service excellence to enhance staff's capacity to provide culturally competent care.

Insurance Plans - FCCC accepts a variety of medical insurance including Medicare, Medicaid and private insurers. Additional funding from state and foundation grants enables us to offer cancer screening and treatment for breast cancer. Financial counseling is available to persons who do not fall within these categories.

Health Status and Behaviors - Seventeen percent of adults in the service area smoke cigarettes, and 60% of them have tried to quit in the past year without success. Fox Chase Cancer Center offers smoking cessation assistance to all patients using tobacco products through the Tobacco Treatment Program. Participants in this program receive counseling along with the use of pharmacotherapy (nicotine replacement therapy and/or other medications). This year, Fox Chase's smoking cessation program expanded, with the assistance of our local partners, to members of the community. The smoking cessation program is held at community partner sites and escent H(Form 990) 2016 Section C. Supplemental Information for Part V, Section B. includes education, counseling, and pharmacotherapy. This program is open to community members that are interested in quitting tobacco. The program will be held at least three times per year.

The OCO continues to provide bilingual (English and Spanish) lung cancer education via our Community Speakers Bureau. This one-hour session provides an overview of cancer, reviews lung cancer risk factors, prevention, symptoms, screening guidelines and treatments for lung cancer.

Access and Barriers to Health Care - There is an unmet need in the service area for screenings and preventive care. Through our Speakers Bureau, the OCO provides participants with valuable information regarding screening guidelines for breast, cervical, colorectal, ovarian, prostate, and skin cancers. To further our education, the OCO brings cancer screening to the community via its mobile screening unit (MSU). Recognized as a best practice to reducing structural barriers, the OCO brings breast cancer and skin cancer screening to the community. In FY2016, we reached 3,331 persons with breast, prostate head/neck, and/or skin cancer screenings. Individuals requiring language services were provided with a certified medical interpreter at no cost to the patient. Individuals identified with abnormal findings that require follow-up will be supported with navigation services including transportation to and from FCCC at no cost to the patient.

Difficulty navigating the health care system - in addition to the language and transportation services provided to patients in-need, our community Section C. them as they receives services. Patients diagnosed with cancer are assigned a nurse navigator to support ongoing needs i.e. scheduling, testing and overall coordination of care etc.

Clear Communication - Staff from the Resource and Education Center (REC) provide credible resources to assist patients and family members with patient education materials and support to increase their knowledge so they become more active participants in their health care. These services are also available to non-patients from the community.

UNMET NEEDS AND IDENTIFICATION PROCESS The unmet health care needs for this service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the Healthy People 2020 goals for the nation. In addition, for Household Health Survey measures, tests of significance were conducted to identify and prioritize unmet needs. Lastly, input from the community meeting participants was also used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs. As a specialty hospital that focuses on cancer, FCCC does not specifically provide community or patient services that address overweight or obesity. However, these services are addressed by our health system at other hospitals including one adjacent to our campus - Jeanes Hospital. Our health educators do address the importance of maintaining a healthy weight and the negative impact of obesity on cancer along with general information regarding a balanced diet and exercise guidelines via our

Community Speakers Bureau.

- 1 Required descriptions. Provide the descriptions required for Part I, lines 3c, 6a, and 7; Part II and Part III, lines 2, 3, 4, 8 and 9b.
- 2 Needs assessment. Describe how the organization assesses the health care needs of the communities it serves, in addition to any CHNAs reported in Part V, Section B.
- **3** Patient education of eligibility for assistance. Describe how the organization informs and educates patients and persons who may be billed for patient care about their eligibility for assistance under federal, state, or local government programs or under the organization's financial assistance policy.
- 4 **Community information.** Describe the community the organization serves, taking into account the geographic area and demographic constituents it serves.
- **5 Promotion of community health.** Provide any other information important to describing how the organization's hospital facilities or other health care facilities further its exempt purpose by promoting the health of the community (e.g., open medical staff, community board, use of surplus funds, etc.).
- 6 Affiliated health care system. If the organization is part of an affiliated health care system, describe the respective roles of the organization and its affiliates in promoting the health of the communities served.
- 7 State filing of community benefit report. If applicable, identify all states with which the organization, or a related organization, files a community benefit report.

### Part I, Line 3c:

# Not applicable. The American Oncologic Hospital does use Federal Poverty

The Hospital provides patient care services without charge, or at amounts less than established rates, to patients who meet the criteria of its charity care policy. Criteria for consideration under the charity care policy is based primarily on family income and worth, but also recognizes other circumstances where undue financial hardships exist. The Hospital maintains records to identify and monitor the level of charity care it provides. Because collection of amounts determined to qualify as charity care are not pursued, patient service revenues are reduced by such amounts. The Hospital also provides services and supplies below cost to patients covered by government insurance programs, including the Medicare and Medicaid programs.

See Part V, Section B for further information.

Part I, Line 7:

As set forth in the Fox Chase Cancer Center Emergency Care, Charity Care and Financial Assistance Policy, it is the policy of Fox Chase Cancer Center to provide all necessary urgent care to patients without regard to their ability to pay for such care. Given this mission and within the guidelines of prudent business management, it is further the policy of Fox Chase Cancer Center that an orderly and controlled system for the write-off of all types of Bad Debt and Charity Care balances is in effect to insure maximum collections. All patients have the option to apply for the Fox Chase Cancer Center Charity Care Program. women within our service area. Low-income, uninsured or underinsured women screened on the Fox Chase Cancer Center (FCCC) Mobile Screening Unit (MSU) for breast cancer are covered under funds secured via state contract via the Pennsylvania Healthy Women Program (HWP), a federally funded program of CDC's National Breast and Cervical Cancer Early Detection Program (NBCCEDP). Eligible women receive free or low cost mammograms and if diagnosed receive treatment. In the event of a cancer diagnosis or a high-risk finding, OCO will prepare and submit the application on behalf of the patient to the Healthy Women Program. HWP will forward the application to the appropriate Pennsylvania County Health Department. Once approved the patient receives instructions to enroll in a Medicaid plan. If needed, financial services can provide additional support. Additional funds secured through foundations such as Susan G. Komen enable us to provide screening and diagnostic services to medically underserved women in our service area. Should a woman be diagnosed, she would be transitioned to the HW program. In FY 2017 our Community Cancer Screening program reached a total of 2,680 individuals with breast, skin, and prostate cancer screenings.

OCO also brings cancer education to the community through our Community Speakers Bureau program. Community Health Educators provide free, bilingual (English and Spanish) cancer education programs to community organizations. In FY 2017, we reached a total of 1,635 persons with cancer education and information. We addressed a wide array of cancer topics including breast, cervical, colorectal, lung, ovarian and skin cancers. All of the programs provide an overview of the cancer, associated risk factors, updated screening guidelines and methods to diagnose and treat cancer. Materials used to support the program are written in "plain language" to address literacy issues also identified in the CHNA. An additional 4,913 people were reached through health fairs and other large community events. The CHNA also illustrated a need for tobacco cessation, leading OCO to establish a community outreach tobacco cessation program to address the lung cancer burden in our region. In FY2017, we reached 13 people through this program. Through our Resource and Education Center we provided 2,296 patients, families, and community members with access to free cancer information and resources that address the cancer continuum. OCO also works with community

Care Connect is a collaboration linking Fox Chase Cancer Center and community physicians. Primary care and internal medicine physicians in communities throughout the Philadelphia region are working with Fox Chase in areas that support the integration of cancer prevention education, screening, treatment and survivorship care plans into clinical practice. CMEs are also provided to health care providers through the Fox Chase Care Connect program. These health care providers are affiliated with Temple University Healthy System and Fox Chase pays for their CME credits. In addition, presentations are provided to staff at the physician offices in order to educate them as well on various cancer topics. Through our Immersion Science High School Program, FCCC provides free education programming to diverse high school students from the target region. The Immersion Science program provides staged, comprehensive training for high school students in cancer research in order to increase retention in biomedical careers and to provide direct instruction in laboratory techniques and scientific thinking. There is no cost to participate, and, in fact, summer salaries were provided to students in the Phase 3 segment of the program. full-time (\$2,250) fellowships for research in Fox Chase laboratories. In 2017, 19 students from 19 Philadelphia area schools were trained in formal programs and an additional 300 students via our teacher training and camp programs. Our in-house program provides 16-20 students/year with undergraduate/graduate level training aimed at understanding how dietary components influence cancer signaling. Eight of these students continued their research as National Cancer Institute CURE summer fellows, with 16% of all CURE summer fellows now published authors. Due to the success of the in-house program in training diverse students, we expanded the program in 2016 to include an in-classroom component. Two hundred fifty students in 4 Philadelphia high schools and 1 rural New Jersey high school conducted ISP research in their home classrooms in 2017. Of these students, 214 participated in a Symposium in June 2017 where they learned about careers in biomedicine and presented their work to 100 Fox Chase Cancer Center scientists. This model will be utilized again in 2018, with the addition of one more high school, an anticipated reach of over 300 students. Esperanza College, and Montgomery County Community College campuses in Blue Bell, PA and Pottstown, PA. This program enabled 48 students with limited access to science education to gain experience in modern laboratory techniques and develop new understanding of the impact of diet on cancer. Two grants to support the program were recently awarded, with the goal of a dramatic expansion of the program in the next 2-5 years. All Immersion Science Programs are cost-free for the students to ensure equality of participants.

Another program focused on high school students is the Abraham Lincoln High School/Health Care Pathway program. The Ambulatory Care Services department at FCCC works with about 20 high school students that are considered high risk students from economically disadvantaged families. The staff teaches them nursing assistant skills in their classroom and then the students spend time at Fox Chase where they work with clinic assistants to allow them to apply the knowledge learned in the classroom to the workplace. The goal of the program is to equip the students with work ready skills and decrease the high school dropout rate. <sup>682700</sup> 11-02-16 Schedule H (Form 990) 2016
